

KEVIN JOHAN GONZÁLEZ V. *FullStack Software Developer*

✉ vin.devsito@gmail.com ☎ +573178952025 📍 Bucaramanga, Colombia  [LinkedIn](#)  [Github](#)  [Website](#)

Profile

FullStack Developer with nearly 3 years of experience, specialized in contributing to teams through the construction of scalable architectures (High Cohesion and Low Coupling) and the advanced integration of Artificial Intelligence. Expert in collaborating to modernize interfaces (React/Astro) and strengthen the backend. I stand out for my ability to work in tune with business needs, translating complex requirements into efficient technical solutions that optimize processes and the overall success of the product.

Professional Experience

FullStack Developer / Implementation Lead 02/2025 – 05/2026
[Clonai S.a.s](#) 

I acted as the technical co-creator of the SaaS product from its MVP phase, leading the development of the architecture and business logic. Subsequently, given my comprehensive understanding of the system and following a strategic restructuring, I was selected to assume the role of Implementation Lead, combining continuous technical development with the direction of the delivery team.

Key Achievements:

- **Architecture Co-creation and Consolidation:** I led the design and scaling of the product's foundations, covering database modeling, business logic, and UI/UX, ensuring a stable, scalable SaaS environment aligned with market requirements.
- **Artificial Intelligence Engine:** I participated in the structuring of an autonomous agent engine for support, assisting in the implementation of multi-LLM fault tolerance and a dynamic real-time security policy pipeline.
- **Technical Leadership and Change Management:** I directed and trained the implementation team under a new commercial strategy. I facilitated agile ceremonies (dailies), coordinated requirements directly with clients, and transmitted good development practices to elevate the operational quality of the department.
- **Process Standardization:** I devised and established the formal guidelines for the implementation role. I developed a centralized tracking system—relying on automations and Spreadsheets with dynamic filtering—that brought order, control, and visibility in the face of the startup's constant strategic pivots.

FullStack Developer 10/2023 – 02/2025
[Campuslands Co-working](#) 

I contributed to the development of internal and external AI-driven platforms, focused on improving commercial management, digital service delivery, and customer service.

Key Achievements:

- **Critical Delivery and Business Impact:** I led, alongside the UI/UX design team, the total redesign of the interface under extremely strict and highly demanding deadlines. The successful deployment in record time was a determining factor in materializing product validation and securing the financial backing of a key stakeholder at an investment table.
- **E-commerce and AI Integration (Custom Solution):** I designed an automated flow in Shopify (using Liquid and GraphQL) connected to a dynamic form and [Make.com](#)  to overcome the platform's limitations, achieving the automated generation and delivery of legal documents using AI.
- **Deep Refactoring and Migration:** I executed the complete transition of ecosystems from JavaScript to TypeScript and from Vue to Astro, ensuring a more robust and easily maintainable codebase for the rest of the development team.
- **UI Redesign and Integrations:** I integrated regional payment gateways, leaving the infrastructure ready for recurring subscription models.

Education

Software Development Technician 09/2023 – 02/2025 | Floridablanca, Colombia
[Campuslands S.a.s](#) 

Intensive and practical training oriented to the IT sector. Dual focus on technical skills (Software Skills) and soft skills (Soft Skills), complemented by agile methodologies, monthly performance tests, technical interview simulations, and elevator pitches to experts.

Skills

Languages

TypeScript, JavaScript (ES6+), Python, Java, GraphQL, Liquid.

Tools and Automation

Git, REST API Design, Shopify, [Make.com](#) , Advanced Spreadsheets (Spreadsheets with automation and dynamic filtering).

AI, Architecture and Processing

Integration of LLMs and Autonomous Agents, Advanced Prompt Engineering (dynamic context management and prompt capsules), Software Architecture (High Cohesion and Low Coupling), Multithreading.

Databases and BaaS

PostgreSQL, MySQL, Convex, ORM Management.

Frameworks and Libraries

React.js, Astro, Next.js, Node/Express.js, Spring Boot, Tailwind CSS.

Leadership and Methodologies

Technical Leadership and Mentoring, Requirements Management with Clients, Process Standardization, Scrum / Agile Methodologies
